1. Applicant's election with traverse of Group I, claims 1-6 and 22-26 in the reply filed on 7/13/06 is acknowledged. The traversal is on the ground(s) that "The Examiner is respectfully requested to reconsider the Requirement for Election of Species given in the Office Action, because of the increased costs applicant would be forced to bear if the two species are separately examined. Furthermore, the field of search must necessarily cover both species, in addition to other related Classes and subclasses, to provide a complete and adequate search. This is not found persuasive because "The species are independent or distinct because Group I discloses that the magnet is located on the opposing top surface of the slider; Group II discloses that the magnet is located is mounted on the outer surface of the side surface of the slider; and Group III discloses that the magnet is internally located within the read-write head assembly." They are different search.

The requirement is still deemed proper and is therefore made FINAL.

2. Claims 7-21 and 27-40 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected claims, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on 7/13/06.

3. Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

The term "means" in the abstract, line 3 should be avoided.

4. This application is in condition for allowance except for the following formal matters:

See paragraph No. 3 set forth, *supra*.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.

5. Claims 1-6 and 22-26 are allowed.

6. The following is an examiner's statement of reasons for allowance:

The prior art of record neither discloses nor suggests a read head that has been tuned for read bias including a slider body having an air bearing surface and an opposing top surface; a pair of parallel and overlapping magnetic shields at one end of the slider body and a magneto-resistive read stack between said shields, together forming a magnetic read head that has an air bearing surface which is coplanar with that of the slider body; and a permanent magnet, having a magnetic axis parallel to said top surface, mounted on said top surface, as set forth in claim 22.

The prior art of record neither discloses nor suggests a method for tuning read head bias including steps of providing a slider body having an air bearing surface and

an opposing top surface; forming a pair of parallel and overlapping magnetic shields at one end of the slider body and sandwiching a magneto-resistive read stack between said shields to form a magnetic read head that has an air bearing surface which is coplanar with that of the slider body; and mounting on said top surface a permanent magnet, thereby effecting polarization of the shields at the air bearing surface and enabling said magnetic read head's bias point to be tuned, as recited in claim 1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
